Talent List

Language II (Japanese)

You are very well versed in the chosen language; you are a native speaker.

Language I (Greek)

Description

Language I (English)

Description

Alertness I

Keen Senses: Add the lower of your ***Intelligence*** or ***Dexterity*** as a **Bonus** to **Awareness Rolls**.

Athlete I

Whenever you roll an *Athletics* test with ***Strength***, you can also add your ***Agility*** as a **Bonus** to the roll. Whenever you roll an *Athletics* test with ***Agility***, you can also add your ***Strength*** as a **Bonus** to the roll. Your GM has final say if this might not be applicable in some rolls (e.g. a pure feat of ***Strength*** to lift a boulder).

Combat Reflexes I

First to Act: If you roll no **Hitches** (or you reduce your **Hitches** to 0) in an **Initiative Roll**, increase your **Initiative** by 1 (up to your **Max Initiative**).
Honed Reflexes: Gain a d8 **Bonus** to any out of combat roll that has to do with reflexes and reaction time.

> ✪ **Quick Draw** *(Requires **Dexterity** d8)*
> *Quick Fingers:* Reduce the **Cost** of the *Quickdraw* **Effect** by 2.
> *Reflexive Draw:* You may **Invoke** *Quickdraw* in a *Reflexive Attack* for the normal cost.

Defense II

Guards: If you *Parry*, reduce the **Cost** of the *Swift Recovery* **Effect** by 2.
Wards: Increase the **Value** of the **Die** you **Assign** to **Invoke** the *Block* **Effect** by 2 (before halving).

> ✪ **Hard to Hit & ✪✪ Step Aside**
> *Combat crouch:* Any **Bonuses** to you or **Penalties** to enemies due to you being behind **Cover** are improved by one step, to a max of d12.
> *Crooked Strike:* If you *Parry*, gain your *Reflexes* as a **Bonus**.
> *Voiding:* If you *Dodge*, add as a **Bonus** your *Melee* if against a melee weapon, or your *Unarmed* if against an unarmed attack.
> *Zig-Zag:* As long as you have enough room to move around (GM's discretion, a 2-3 meter radius all around is enough) and you don't benefit from **Cover** (except from a shield), any attack against you suffers your ***Agility*** as a **Penalty**.

Fortitude I

Enduring: You gain a d8 **Bonus Die** to **Stamina Rolls** involving exertion, physical labor or fatiguing situations, from farm work to forced marches, including recovering from **Fatigue** and **Exhaustion** including the *Second Wind* **Action**, but not rolls for **Incapacitation**.
Hardy: You have one additional **Strain Slot**.

> ✪ **Tough**
> *Ignore Pain:* Reduce the **Pain Penalty** from being **Injured** by one step.
> *Recover:* The **Bonus** from *Enduring* applies to **Stamina Rolls vs Incapacitation**.

Presence I

Leadership: When you are trying to convince, inspire, cajole or threaten your followers to a specific course of action (e.g. entering a scary dungeon), you gain a d8 **Bonus**.
Motivate: Outside of combat, if you personally direct anyone willing to listen, they can add your ***Personality*** as a **Bonus** to one specific action.

Resilience I

Discipline: When you **Push** on a **Fear Roll**, **Self-Control Roll**, or other roll where your discipline would help you like against coercion or outright mind control, you can, instead of rerolling a **Die**, set it to half its maximum **Value** plus 1 (e.g. 5 if a d8).
Unperturbed: Increase your **Composure Threshold** by 1.

> ✪ **Bravery**
> *I got this:* When making a **Fear Roll**, you may add any one ***Attribute*** or *Skill* as a **Bonus Die**, assuming it is relevant to the situation and the GM approves (e.g. *Athletics* against a fear of heights, *Melee* or *Unarmed* against a fearsome foe etc.). You cannot choose ***Willpower*** or *Resolve*.

Survival II

Camouflage: Gain a d10 **Bonus** when sneaking up on someone or hiding from them when in wilderness.
*Survival Training: G*ain a d10 **Bonus** to any roll that your survival training would help- navigating the wilderness, foraging for food or tracking your quarry, as well as against environmental hazards like blizzards or desert storms.

Warrior II

Combat Sense: When you perform a melee or unarmed attack against a target without the Warrior **Talent** or with Warrior I, you may choose to perform **Step 5B** (**Defender Assigns Dice for Effect**) first, then perform **Step 5A** (**Attacker Assigns Dice for Effect**).
Veteran: When you **Push** yourself during a melee or unarmed *Attack* or a *Parry*, you can, instead of rerolling a **Die**, set it to half its maximum **Value** plus 2 (e.g. 6 if a d8).

> ✪ **Grappling Expertise**
> *Armed Grappling:* If you attack a target you have **Grappled**, with an unarmed attack while holding a single weapon, you may add its **Accuracy** as a **Bonus**.
> *Holds:* Any target **Grappled** by you suffers your *Unarmed* as a **Penalty** in addition to your ***Strength***.
> ✪ **Sword Expertise & Sword Mastery**
> *Fencing:* During an *Attack* or *Parry* with a sword, gain a **Bonus** equal to your *Melee* or the sword's *Accuracy*, whichever is lower.
> *Half-Sword:* If you have one hand free or are wielding a sword in both hands, you may consider a sword's **Reach** as two steps lower, and reduce the **Cost** of the *Weak Spot* **Effect** by 1 for attacks with the sword. You cannot use this benefit if you cannot somehow grab the blade of your sword safely (e.g. an energy blade).
> *Master-Strike:* When you *Attack* with a sword and **Invoke** *Block*, if the attack is successful, do not halve the **Value** of the **Assigned Die.**
> *Perfect Balance:* The **Accuracy** of any sword you are holding counts as one step higher; if it was already d12, then you ignore 1 **Hitch** in an *Attack* or *Parry* with it.
